

Family Engagement at Leda ESC

At Leda Education Support Centre we are passionate about family engagement, we believe that families are an integral part of the education of children. We understand that when families are engaged in their child's learning, a student's achievements at school increase.

Our Vision: At Leda Education Support Centre, we are working towards building a positive partnership based on respect and trust between the school and families. We see our families as an integral part of the school community and we aim to empower our families to support the students: academically, socially and emotionally.

Since 2019 we have established a family engagement committee which meets once per term to discuss and implement new ways to increase family engagement with the families of our students in our centre.
